About Me

A passionate problem-solver with hands-on experience in web development, project management, and software security. Known for leadership, teamwork, and a collaborative mindset, I thrive in environments that require innovative solutions. With a strong foundation in React.js, Node.js, and agile practices, I am excited to transition into software development roles where I can contribute to impactful, real-world projects.

Work Experience

Software Intern, IFM Engineering Pvt. Ltd

July 2024 - Present

- Conducted software testing and security audits on mobile and web platforms using BurpSuite and MobSF, collaborating with development teams to identify and resolve critical vulnerabilities.
- Worked in an agile environment, collaborating with cross-functional teams to ensure secure and efficient software delivery.
- Implemented security best practices by proposing solutions to mitigate existing vulnerabilities and improve overall system resilience.

Projects

Job Tracking Web Application, Windals Precision Pvt. Ltd

Aug 2022- Apr 2023

- Developed a job tracking system to streamline manufacturing processes for Windals Precision Pvt. Ltd., reducing process time by 20%.
- Developed frontend as required for the functioning of the application using React.js.
- Tech Stack used - React (Frontend), Node + Express (Backend), MySQL (Database).

Hospital Inventory Management System

Jan 2023- Apr 2023

- Designed and built an inventory management system that improved operational efficiency, reducing time spent on stock management significantly.
- Developed front-end as required for the functioning of the application using React.js.
- Tech Stack used - React (Front-end), Node + Express (Back-end), MongoDB (Database).

Educational Background

Bachelor of Technology (B. Tech)

Vishwakarma Institute of Information Technology, Pune

June 2021 - Present

- Specialisation in Computer Engineering
- Proficient in Web Development and Software Engineering

Skills

Technical Skills

- Software Development
- Agile Project Management
- Cloud Computing
- Web Development
- C/C++
- Python
- JavaScript
- Database Management System

Soft Skills

- Communication
- Team Player
- Leadership
- Adaptability

Tools/Software

- React JS
- MySQL
- MongoDB
- Node JS

Languages

- English (Fluent)
- Hindi (Fluent)
- Marathi (Proficient)

Certification

- IBM Full Stack Developer
- Meta Database Engineer

Additional Information

- Served as President of CyberCell VIIT for A.Y 2023-2024
- Ranked in Top 1% (Under 10000) in global leaderboards of TryHackMe
